GENERAL TRAINING COURSE ON JMIT MACHINES

Programme

The programme has a theoretical part (approx 2 days) and a practical part (approx 3 days), and covers the following topics. As far as possible, the course programme will take into consideration the JMIT machines in use at customer site.

The range of JMIT machines	• JMIT plant tour: overview of facility • An overview, classification machines vs. application
Understanding yarns	• General information, types of feeding, yarn preparation for use on the machines
Explanation and preparation of the "set-up chart"	• Analysis of set-up charts and explanation of symbols used • Preparation of set-up charts (for both elastic and non-elastic samples) • Main features, installation, functions and use of mymueknit software for pattern creation
Working on the machine	• Machine set-up according to the set-up chart • Setting and adjusting of the machine's basic parts • Production of samples: elastic and non-elastic articles • Quality control on the finished product • DATA CONTROL CONTROLLER: overview of the functions (for electronic machines) • Programming a pattern on MEMORY/USB pendrive and data transfer to the DATA CONTROL CONTROLLER (for electronic machines)
Conclusion	• Analysis of specific topics and requests

Are there any particular topics, which are not included in the main programme, that you would like to discuss? Please consider to participate to a personalized training course in JMIT. For more information, contact your Sales Area Manager.
